

EDITORIAL ANNOUNCEMENT

The negative consequences of tobacco use reached enormous proportions. WHO Framework Convention on Tobacco Control stresses the importance of research in this field and need of dissemination of its results as a priority.

Editorial office responds to the need for evidence-based knowledge and current scientific understanding of the negative impact of tobacco use on individuals and society as a whole.

Therefore, we decided to dedicate one issue of CEJPH to this topic.

We invite authors to present the results of their research in the field of epidemiology of tobacco use and its negative impact on health, socio-economic aspects, prevention, etc. in this special issue of CEJPH.

Closing date for submission of contributions is September 30, 2011
