

ENVIRONMENTAL HEALTH

V. Srb, J. Tejral, S. Šmejkalová, Z. Fiala

Department of Hygiene and Preventive Medicine, Faculty of Medicine, Charles University, Hradec Králové, Czech Republic

SUMMARY

A short history of the close connections between human health and ambient environment (environmental health) in the global and national (Czech Republic) sense is presented. Concrete tasks and prospects for the near future are mentioned, including the human ecology education programme.

Key words: human ecology, environmental health, sustainable development, education

Address for correspondence: V. Srb, Charles University Medical Faculty, Department of Hygiene and Preventive Medicine, Šimkova 870, 500 01 Hradec Králové, Czech Republic
